

Advanced Health Insurance Plan – 10 Lakh Comprehensive

1. Introduction

The Advanced Health Insurance Plan (10 Lakh Comprehensive) is designed for individuals seeking enhanced coverage including higher room rent limits, global emergency coverage, and broader critical illness benefits. This plan includes additional features such as automatic sum insured restoration and optional add-on covers.

2. Enhanced Scope of Coverage

In addition to standard inpatient coverage, this plan extends benefits to:

- Worldwide emergency hospitalization for accidents and sudden illness subject to territorial conditions.
- Daycare procedures where 24-hour hospitalization is not required due to medical or technological advancement.
- Organ donor expenses for harvesting of organs from a donor.
- Domiciliary hospitalization for medical conditions that mandate home-based treatment.
- Second medical opinion for listed critical illnesses through empanelled specialists.

3. Sum Insured, Restoration, and Multiplier Benefits

The base sum insured under this plan ranges from ₹10,00,000 to ₹50,00,000. Automatic restoration of

100% of the base sum insured is available once in a policy year when the base sum insured is exhausted, subject to the conditions that the claim is unrelated to previous claims. A no-claim multiplier benefit enhances the effective sum insured by 50% to 100% over claim-free years, up to a defined maximum.

4. Waiting Periods and Critical Illness

The policy is subject to:

- 30-day initial waiting period for all illnesses except accidents.
- 24-month waiting period for certain listed conditions such as joint replacement, cataract, and varicose veins.
- 48-month waiting period for declared pre-existing diseases including but not limited to coronary artery disease, chronic liver disease, and malignancy.

Critical illness cover for conditions like myocardial infarction, stroke, and major organ transplant may be available as an optional add-on with a separate sum insured and waiting period.

5. Exclusions and Special Conditions

This plan excludes expenses arising out of:

- Investigational or unproven treatments not part of evidence-based medicine.
- Obesity and weight-control surgery except where medically necessary as per defined criteria.
- Treatments arising from participation in hazardous or adventure sports unless covered by specific add-on.
- Self-inflicted injuries, suicide attempts, and injuries under the influence of alcohol or narcotics.
- Non-medical expenses and consumables as defined in the annexure of non-payable items.

6. ICU and Room Rent Limits

For this plan, the room rent is permitted up to a single private AC room without monetary sub-limit.

ICU charges are covered at actuals, subject to the overall sum insured. Proportionate deduction shall not apply where the insured opts for the entitled room category. However, if the insured chooses a higher category than entitled, the proportionate deduction shall apply to all associated hospital expenses except pharmacy and diagnostics.

7. International Emergency Coverage

The policy may offer coverage for emergency hospitalization outside India for a period not exceeding

30 days per trip and 90 days in total during the policy year, provided the insured is a resident of India and the treatment is not taken for the purpose of medical tourism. Claims must be supported by

appropriate medical records, invoices, and proof of travel. Currency conversion shall be based on the exchange rate published by the Reserve Bank of India on the date of payment.

8. Example – Validation for Acute Malaria Claim

For an insured person aged 40 years, diagnosed with acute Plasmodium Falciparum malaria and requiring a 4-day hospitalization in a single private AC room, the admissibility of the claim will consider:

- Whether the 30-day initial waiting period has passed.
- Whether there is any applicable specific-disease waiting period.
- Whether the hospitalization was medically necessary and supported by diagnostic reports.
- Whether the room category matches the eligibility under the plan.
- Whether any co-pay or deductible is applicable as per plan variant or age.
